module 4

activity 11

The Recycling Area

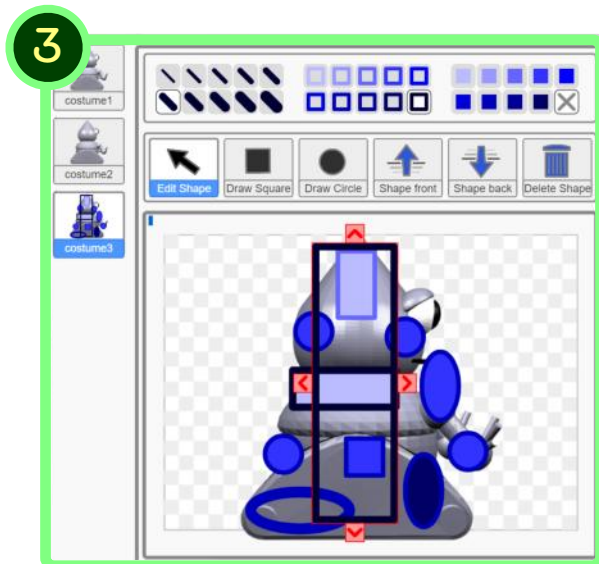

The grey robot needs to pass the grey, green and blue recycling areas to turn off the sorting bot.

To do this the grey robot needs a green and blue costume.

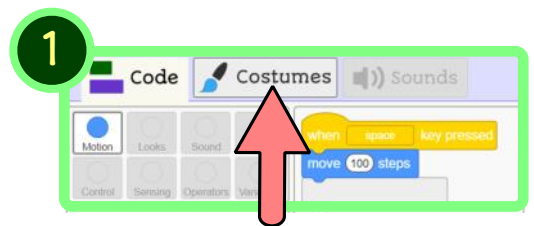

2) Duplicate costume1 two times so you have 3 costumes.

3) Use Professor Robert's Costume creator to create a blue and green costume for the grey robot.

1) Click on the costumes button.

4) When you have created a blue and green costume click back on costume 1 and then on the code tab.

5) Add costume and move blocks so the grey robot moves past the recycling areas.
